PROFESSIONAL SUMMARY

Motivated and detail-oriented Information Technology graduate from the Polytechnic University of the Philippines, Sto. Tomas Campus, with strong knowledge in full-stack development, database management, and UI/UX design. Demonstrates the ability to develop functional, user-centered solutions through academic and collaborative projects, with a strong foundation in problem-solving, software development, and technology.

TECHNICAL SKILLS

- HTML, CSS
- Bootstrap
- JavaScript
- Python, C, C++, C#
- Figma, Canva
- Github
- PostgreSQL, MySQL
- Microsoft Tools

EDUCATION

Diploma in Information Technology (DIT)
Polytechnic University of the Philippines -
Sto. Tomas Branch
2026 - Present
3rd Year Graduate

**Senior High School - Science, Technology,
Engineering, and Mathematics (STEM) Strand**
Nova Schola Tanauan
2020 - 2022

Junior High School (Grades 7-10)
Natatas National High School
2016 - 2020

CERTIFICATES

- Research in the Age of AI: Smarter Research without Compromising Ethics
- AI Unlocked: The future is now Exploring the potential the power and potential of AI
- Wonder of UI/UX Design - Where Creativity Meets Functionality

PROJECT EXPERIENCE

Canteen Online Ordering System
Developed a QR-based web application for online canteen ordering and real-time queue tracking. Implemented QR code validation, order management, and role-based access for students and staff. Built using PHP, MySQL, Bootstrap, JavaScript, and AJAX.

Java Gaming Suite
Collaborative Team Project
Contributed to the development of three interactive games using Java programming language, including a classic Snake game. Applied object-oriented programming principles and implemented game logic, user controls, and dynamic graphics rendering to create engaging gameplay experiences.

Reselling Cars System
Collaborative Team Project
Built a responsive automotive resale platform using Python with MySQL backend integration. Developed features for vehicle listing management, search functionality, and transaction processing while ensuring optimal performance and database reliability.
